

# Soul Clearing

By Psychic Medium MarVeena Meek

I am a show me girl at heart. I like to see how something will affect me in a tangible way. So when I first was aware of soul clearing I couldn't see why I would need it. One of my good friends was training to do this work and asked me to volunteer for a clearing so she could practice on me. I said as long as it isn't painful I will go along with it.

She did it by remote. I just gave her my birthday, name, and birth county.

Well a few days later she calls me and tells me about the clearing. I was interested but still didn't know how this could be of value. She told me about my soul group, my archangel group, various bits of information. Then she told me she did an *abundance diversion valve clearing*. She checked to see if my valves were open and found they were not. She asked me how my financial state was and I told her terrible. My husband and I were barely getting by at the time. She told me that I had an etheric device that was keeping my valves/life force energy directed away from me and to another entity's goals. So she went into the Akashic Records and *banished that entity* so that what was mine was going to my dreams and goals.

I didn't really believe it when she said that. Then I got a chance to invest \$5,000.00 in another venture that paid a *significant profit* in two months. Amazing for me. I couldn't believe it. I had been living on such a low expectation for a long time. Then all this money happened really fast. Only then did I remember her telling me she did an abundance diversion valve clearing. I made the connection between what she said and what had happened. Like I said, I am a show me girl.

So after that I was more of a believer. I felt guided to learn how to do this work and found it to be really fascinating, as well as useful in a tangible way.

## How does a Soul Clearing work?

All of the clearings are done through the *Akashic Records*. Here are some of the things that I ask questions about in the *Akashic Records* on your behalf:

- 📌 What Archangel are you connected to in this lifetime?
- 📌 What soul group are you with?

- Are your shields up?
- Do you have *negative spirit guides*?
- Do you have portals open to other astral planes or dimensions?
- Do you have any entity attachments?
- Do you have *spells or curses* against you?

I ask about three times that many questions. The answers that I get determine what sorts of ceremonial prayers I must do in order to clear these situations.

[MarVeena talks about Soul Clearing in a radio interview with Lois Wetzel](#)

### *Can a Clearing be performed on a house or property?*

It is possible to clear out *poltergeists* and do house/land clearings and blessings through this process. Our homes are very vulnerable to entities because we have so many systems coming in to them. We have our TV's, microwaves, cell phones, telephones, computers, and people coming and going all day. So our homes are being *constantly invaded*. It is good to get all the stray electrical magnetic stuff out and away from you. You don't want to live in all that junk! When I do a blessing I align the home with the mineral kingdom, the animal kingdom, and the plant kingdom, ask for angelic blessings and much more.

I ask that you and your home be cleared and in harmony with your soul's original blueprint in truth and purity. Sometimes people's *lives change really dramatically*. They get better jobs, they sleep without having nightmares, they begin to feel like themselves again. They can feel their own power in a good way. A child can sleep in it's own room. Sometimes the change is subtle. No two clearings are alike.

---

My suggestion to you is to meditate and see if this is the right course of action for you at this time and wait for a sign or a sense of knowing that it is.
